KARATE FEELS HARD TO START

Dojo Steps

Flip the steps, copy the moves, earn your certificate.

If you know nothing about karate, it is hard to know where to begin. Dojo Steps is a simple first guide.

- Made for people who do not know karate
- A mini experience of 3 basic techniques
- Stance, straight punch, and front kick
- A Japanese dojo look: paper, ink, and red

02

How Dojo Steps works

Pick a technique, flip through four step cards with Next, and copy each move. A master gives a tip on every card.

- Tap Next to flip each step card
- Each card has a picture, a short text, and a tip
- A master character gives one-line advice
- Switch between Japanese and English anytime

03

A small win, then more

Finish all 3 techniques and the app shows a certificate. It is a fun end to a first try at karate.

- A progress bar shows how many are done
- The certificate has your name and a master's words
- You can print or save the certificate
- Next: decide what the certificate should say
